

FIR-100

Wired Infrared Repeater System

APPLICATION

The Fenger® FIR-100 is a high quality, Plasma Friendly hard wired Infrared Repeater System for use in DIY and/or custom installations, to control up to 4 devices at a remote location (the included cable allows up to 2.7m: perfect for repeating the IR signal to your devices which are hidden away in an entertainment unit or cabinet). All connections are simply 'plug & play' and the kit includes everything you need: an IR Target, Junction Box, two dual IR emitters and power supply. The system is ideal for use with any distribution equipment including video, audio etc.

FEATURES & BENEFITS

- *Hard-Wired Infrared (IR) Repeater / Extender Kit*
- *Suitable for use with up to 4 Audio/Video devices*
- *Rejects interference for a more reliable signal*
